

How to Select Stocks for a Portfolio

(11/26/2019)

How do you find the good stocks?

A. Select stocks with WinTick

APP is used for position trading with daily, weekly or monthly charts. You cannot throw any stock in, then expect good results. It's called "Garbage in and garbage out". The first thing to use APP is stock picking. You may use WinTick seamlessly to select potential stocks from those lists by "AutoScan":

- WinTick Expert
- Hot Watch List for Next 2 Weeks with Buy/Sell Signal
- Weekly Buy Signal
- Top Rated Stocks for Position Trading
- Best Performance Stocks for Position Trading

[Refer how to AutoScan with WinTick.](#)

B. Exam each stock with APP

1. Create a workspace with only one weekly chart and one symbol days back at least 3 years or more.
2. Click icon of the AbleTrendTS, apply to the chart.
3. After click "PP" icon to apply the APP analysis.
4. Click "Auto Setup" to allow the APP to optimize.
5. You need to select stocks with Average Annual Gain greater 20% or more in the 3 years to be your candidate for a portfolio.
6. Type in your next stock, and repeat the above steps.
